ABOUT ME

I am a passionate Frontend Web Developer. I am currently doing Bachelor's degree in Computer Engineering from SIES Graduate School of Technology. Proficient in HTML, CSS, and JavaScript, I have a passion for creating visually appealing and user-friendly websites. My dedication to learning and improving is evident in my certifications and courses. I have completed several projects that highlight my skills and capabilities. During my tenure at PHN Technology Pvt. Ltd. as a Frontend Web Developer from April 2023 to June 2023, I made substantial contributions to web development initiatives, harnessing my technical expertise and adept problem-solving skills. As a Frontend Web Developer at Bharat Intern from May 2023 to June 2023, I actively seized opportunities to refine my skill set and gained invaluable insights into industry practices and dynamics. Apart from my technical skills, I am proficient in using Microsoft Office, particularly Excel, for data analysis and presentation purposes. I have also gained experience in using design tools like Photoshop and Canva, allowing me to create visually appealing graphics. I am actively involved in IEEE SIESGST, where I hold the position of Design Head. I have also served as a Design Volunteer, where I contributed to designing, publicity, and event organization. These experiences have enhanced my creativity, attention to detail, and ability to work in a team. I am meticulous in my work, paying attention to detail to ensure high-quality deliverables. I am passionate about creating exceptional web experiences and delivering high-quality results. I am constantly seeking opportunities to grow, learn, and collaborate with like-minded individuals in the ever-evolving world of web development.

EDUCATION

PROJECTS

Facebook login page

- Created a static website of Facebook login page
- Includes elements such as recent login cards, a login form, and a footer section. The CSS styling defines the layout, positioning, and appearance of the page, including responsive design for different screen sizes.
- Technologies used: : HTML, CSS
- [Github link](#)

Restaurant website

- HTML code consists of multiple files representing different pages and components of the restaurant website, such as the home page, menu pages for different cuisines, sign-in and sign-up pages, and a review page.
- CSS files to apply styling rules to various elements of the website, including the navigation bar, images, buttons, and forms, ensuring a visually appealing and consistent design across different pages
- navigate through the website using the navigation bar
- Technologies used: : HTML, CSS, JavaScript
- [Github link](#)

Personal portfolio

- Created a portfolio website
- A navigation bar with links to different sections of the website, such as Home, Services, Contact, and About.
- CSS styles from an external file to define the layout, colors, and responsiveness of the website.
- includes sections for displaying information about the portfolio, services offered, contact details, and social media links.
- Technologies used: : HTML, CSS, JavaScript
- [Github link](#)

SKILLS

Languages: Java (basic)

Web Technologies: HTML, CSS, JavaScript

Design: Photoshop, Canva

Microsoft Office:Excel

ACHIEVEMENTS

Citizen Certification-Devtown

- Campus Ambassador.
- Certificate of appreciation-Devtown
